## **BOOK SYNOPSIS**

This handbook covers the diagnosis, etiology, and treatment of conditions affecting the locomotor system in small animals. The 4th edition presents up-to-date information on various types of fractures and methods of fixation, lameness and joint surgery, and musculoskeletal diseases. Other key topics include: acute and chronic bone infections; transplantation, plating, wiring, and pinning techniques; bone grafting; reconstructive joint surgery; and osteochondrosis. Content is organized anatomically for quick access to information on both fractures and other conditions for each region of the body. Step-by-step line drawings clearly illustrate different types of fractures and procedures. Provides clear, concise coverage of the most common orthopedic conditions. A new chapter provides cutting edge information on arthroscopy. Each chapter is expanded with the most up-to-date information. Includes many additional illustrations. New coverage of monocortical plate/IM fixation. Discusses circular frames for fractures and osteotomies Provides information on new fixator clamps.
