BOOK SYNOPSIS

This updated edition of *Teaching Students with Severe Disabilities*, is written in a way that makes the most complex findings of research understandable and usable in the real educational world. Drawing on their own experiences, the authors bring a level of currency and reality to the book that is unparalleled. This book offers comprehensive coverage of all of the issues that are pertinent to teaching students with severe disabilities. The authors clearly and completely address both methodology and curriculum, presenting topics in the order in which a teacher would approach them: prior considerations, planning and assessment, general instructional procedures, and, finally, procedures targeted to learners with specific disabling conditions. In addition, they pay thoughtful attention to assessment, the role of paraprofessionals, and multicultural concerns.
