BOOK SYNOPSIS

This carefully designed workbook helps students master legal citation through a series of exercises coordinated with Understanding and Mastering The Bluebook. Starting at beginner level, the workbook introduces students to basic citation forms, then builds on this foundation through a step-by-step series of targeted exercises that both reinforce the basics and introduce new rules. Each exercise presents a caption from an authority and all the necessary information to prepare a full or short form citation. The workbook concentrates on the citations used most in the classroom and in practice. Workbook exercises are grouped to correspond with chapters in Understanding and Mastering The Bluebook, with one or more sets of exercises of ten questions each. The more complex citation forms, such as cases and statutes, are divided into multiple ten-question sets, each targeting a specific subset of rules. A review exercise is provided for cases and statutes which can be used as additional practice or as a quiz. The workbook is planned to give students the practice they need to master citation, while easing the burden on teachers to create exercises and provide detailed feedback. Space is provided in the workbook for students to write the citations, with the pages perforated for easy tear out.
